About This Game

In this puzzle-platformer you'll play assistant to mad scientist Professor Splattunfuder - a scientist, inventor and weapons manufacturer of questionable sanity. Nearing the end of his career, he devoted himself to a terrible "recipe book" focused on the death and destruction of his enemies, preferably using the most stylish methods possible. An unfortunate laboratory accident resulted in the destruction of the first draft - now it's down to you to assist him piece the fragments back together. The evil Professor has grown vats full of helpless creatures known as Splatts that he is using to aid him in a range of awful experiments - which is where you come in. Using all your murderous creativity, a generous helping of weaponry, a passing knowledge of physics and a large dose of violence to the poor helpless Splatts, you'll help the Professor rewrite his classic book of recipes, titled... 101 Ways To Die!

Title: 101 Ways to Die
Genre: Action, Casual, Indie, Strategy
Developer:
4 Door Lemon
Publisher:
4 Door Lemon Vision 1
Release Date: 17 Mar, 2016

a09c17d780

Minimum:

OS: Windows Vista or later

Processor: Quad core 2.5Ghz minimum

Memory: 2 GB RAM

Graphics: DirectX 11 class graphics card with 1gb of video RAM

Network: Broadband Internet connection

Storage: 400 MB available space

Sound Card: DX11 compatible sound card

Additional Notes: Xbox 360 pad or compatible supported

English,French,Italian,German

When zooming in, the camera pans to the right then you have to fight with the camera to show anything else. Refunded this game less than an hour after purchase.. Really enjoyable game. loved the mechanics and physics of the game and how all the different weapons and abilities can be chained to work together.

Very imaginative levels and graphically is superb for a smaller game of this type.

My only real negative point is that although the game has a fast forward ability the gameplay seems a bit slow. I suggest adding varying speeds of fast forwarding. might add to the humour of seeing a character impaled on a spike at 100mph.. Ok where do i begin.....I have never personally wrote a review on anything i think in my life but this game and its developers plus staff deserve my worship and praise....To start off, when i bought the game i bought it because i had a friend who played it on xbox one...It looked so addicting and amazing so i decided i had to have it for my self.. >XD.....I bought the game and downloaded it...Started it up, and it did not work!!!! I tried and tried to fix the issue myself. The issue was that i am using a 32 inch Flat screen emerson tv for a monitor so its a little squirly at times with new games to get the resolution correct to play the games....well this was one of the games....I tried and tried and finally got the resolution correct and got the game to show up on my screen...BUT then the image wasnt aligned with the actually "button" behind the image...so when i went to click on play i had to actually move my mouse to the bottom of the screen...I emailed the staff and devs furiously....Quickly within a few hours they responded and wanted to know what my issue was...I explained and took screen shots and emailed them back...well within a day they had a solution to my problem, or atleast thought we did....It didnt work...well i emailed them back letting them know it didnt work...another couple of hours and they emailed me back letting me know the devs would get together and discuss how to fix my issue and it might take a day or two, and to send them some info from my files on the game crash....so i emailed them the files and some more screenshots and details of the issue...I will admit it took a few days to get a response out of them but when they responded they updated me on the progress of the devs on fixing my issue...well after almost a week they had a solution again...they had in an email attach a fix for my game which would basically reset my game and have it set to the right resolution settings for me personally. i was estatic, thinking i was specially getting a fix just for me from the devs hehe...i downloaded the fix, my game updated and i tried to load it...YES IT WORKED, or so i thought....it reset my game back to normal so it would work correctly, but it didnt fix the resolution so i was back to square one again with the original issue....i emailed the devs letting them know and they responded quickly stating to give them some time and they would come up with a solution again...well almost a week went by and i emailed to check the progress, they emailed me back letting me know they were still working on the fix...almost another week went by and i emailed to check again...well i waited a day or two and one of the publishers in charge over the devs personally emailed me and said that in a couple days they would release a full update on the game to fix the problem for me and anyone else who might have this again...and in about 3 days, i went to get on steam and the game had an update...i let it update...then i clicked play and.....IT WORKED FOR REAL THIS TIME!!!!!! I can now play the full game, no resolution issues, no screen mishaps, nothing...its perfectly running order now...I played it for 4 hours straight after i emailed the devs thanking them of course....then after 4 hours of play i hit a bug...the game went black and i had to restart my computer...i emailed the devs letting them know about the new issue...within 2 days i had another update from steam on the game...i downloaded...and now i play :) IT WORKS PERFECTLY NOW. I have countless hours and countless amount of fun and blood splattering awesomeness...I High thank the devs and staff of 101 ways to die...It is an awesome game, and the staff are amazing, kind, and quick to fix an issue...I highly recommend this game if you like what you read in the description...platformer style, with brain twisting strategy needed for some of the bloodiest most brutally killing for a "splatt" i have ever seen or played..LOVE IT LOVE IT LOVE IT...5 STARS!, 10 OUT OF 10 AMAZING. Awesome dark comedy platformer puzzle game that eases you into the difficulty levels.

Loads of fun even to replay a level.

Hilarious traps and gadgets.. Disclaimer: The publishers of this game offered me a free copy in exchange for this review however this does not impact my recommendation.

101 Ways to Die is a game I can tentatively recommend with a few caveats in mind:

This game is a cute and quirky take on a Lemmings like puzzler, with the major difference being it is a sort of flipside of the coin; your aim is to destroy, rather than protect the little critters at your mercy. The game offers up a neat package of cartoony gore-filled visuals, amusing sound design and simple dark humour delivered through an increasingly complex series of puzzle rooms. You are expected to use your creativity to strategically place tools and traps to guide your unwitting Splatt victims to their untimely demise.

In my short time with the game, the variety and level design steadily opened itself up to more fun and nuanced ways to attain the objectives in mind, and in this aspect the game is a success from what I have seen. The core mechanics are solid and this makes the gameplay fun for those with an interest in this type of creative messing around. There are many issues which can make this frustrating though, and this game is held back by some of its detractions, most of which are technical in nature.

The first problem I noticed was the messy menu system, which was awkward and dated, not to mention strangely unoptimized as I experienced frequent stutters and frame drops while navigating on my system which is far in excess of the recommended specs for this game (this was not noticed in normal gameplay.) The customisation and options are rather limited and sparse, but do the job on a basic level. The tutorial levels were also sparse and basic, and left a lot to be desired; a person new to this type of game might not find very much use in them. I found myself struggling with janky camera controls at times, making setting up my traps become moderately frustrating when I wanted to repeat levels to achieve maximum score. To mention score, the addition of online leaderboards was a nice touch but where this game misses the mark massively is the lack of any player made workshop content, a level editor would be a great boost to this titles longevity and replayability.

Fundamentally this is a game that is going to work for a specific kind of player who enjoys crude humour and screwing around in sandboxy puzzle environments. If you're not that type of guy, there are other games on the market for the money which will introduce you to the genre more effectively. If you're just looking for something new which offers up a few hours of casual, albeit limited fun, then this game is worth a buy.

tl;dr 6/10 maybe buy it if you're into puzzlers.

. The graphics are good, I like the idea of the game and the puzzles are interesting but some of the puzzles started to become more frustrating then fun after awhile. I really found that some of the puzzles became unwinnable if you fast forwarded the play at any time as it seems to throw the timing off on some of the items (such as floating platforms). You also can not go on to the next level without finishing the previous one so, you could get stuck playing the same level for hours and getting nowhere (except maybe a trip to the hospital when your stress level peaks)...

If your into puzzle games and you have a lot of patience then you will probably enjoy this game a lot. Myself; not so much as I don't tend to get a lot of enjoyment from puzzle games.

. This game made me laugh! I love the presidential edition with Hillary and Trump, but the original version is just as fun. It's easy to pick up and play, although it gets more clever and creative later on with a mix of great gameplay and dark humour..
Target audience: Puzzle game lovers\Trump haters

I played the election edition of 101 Ways to Die, and it's one of the funniest puzzle games I've ever played. I'm not going to hold back: finding 101 Death Recipes for Trump was pretty satisfying!

The game is easy to learn but gets more challenging as you progress, and the graphics are bright and polished.

I'd definitely recommend it, especially if you appreciate a bit of dark humour and need a bit of pre\post election stress relief :)

My kind of dark humor rolled into a great little game! Kind of reminded me of lemmings but instead of keeping them alive you have to kill them. There's something satisfying about setting up those traps and watching it all unfold. Was a little slow to begin with but once you get to know the rules it lets you speed up the process so i flew through the levels. My only quarm is that it isnt available on mac. I'm not a huge gamer but I'd defo play this more if i could access it on my own laptop.

Thanks!. I played this on my sons console and I can't remember having so much fun on a puzzle platformer. Killing Splatts in ingenious ways and listening to their noises is so fulfilling. As it progresses, the game becomes quite challenging which I like, as it could be just a repetitive kill fest. Lovely graphics and audio round 101 off nicely to claim classic status. Just play it!. the game is broken i tried and tried everything i should to play it on my alienware 17 and nothing works it crashes on start up i hope its fixed soon then -_-

atm i can't reconmmmand this game because i can't even play it!!!!!!!!!!!!!!!!!!!!!!
